Subject: Microsoft Settlement

If you require any more changes from MS - we will suffer as users of IE and MS. And, we have chosen to use IE and MS.

Fact is - we even **want** the IE icon on our desktop. Makes our computer **much** easier to use.

Let's move on to more important things. When the competition gets better, maybe we will choose another "brand" - but that's the job of **free** enterprise.....

not the courts!

Thank-you,
Mr & Mrs. Ryan Lenox
